

Supercharge your savings while going Green. Start Electric!

Access to clean, safe, and affordable transportation is essential for the well-being & sustainability of our cities, societies and economies. However, despite improvements in vehicle efficiencies over time, road transport still accounts for approximately 17% of energy-related carbon dioxide emissions globally.

We all know and understand that our green actions today will have a positive bearing on the future – for us and for our children. Knowing that the EV revolution is just beginning to take-off, you could be among the first few to embrace the journey leading to an emission-free world. Have you thought about leasing an Electric Vehicle?

Why it makes sense?

- Save on hefty fuel bills
- Economise on maintenance costs
- Derive lease benefits – tax savings
- Reduce your carbon footprint
- Contribute to a greener world

Mahindra e2O Plus and eVerito are now available on SalaryPlan for you to Lease.

[Click here](#) to select your Electric Car and start making your lease quote.

Accelerate your way into a cleaner and happier world.
